School of Computer Science & Engineering
Lovely Professional University, Phagwara, Punjab

SIX WEEKS SUMMER TRAINING

Training/ Mini Project Report (whichever is applicable).

1. Report should cover the following contents:
   - For those students who have just **learnt a technology:** *See Annexure-I(a)*
   - For those students who have **developed a Mini Project:** *See Annexure-I(b)*

   - The Report should be of minimum 20-25 Pages.

   - Spiral binding is required from every student
   .
   Note: project is not compulsory for evaluation. Student can opt any one option either technology or project based on technology learned.

Relevant PPT Presentation
   - Presentation should be brief and cover only important and effective Learning
   - Outcomes.
   - Avoid unnecessary textual details in the presentation.
   - Use illustrative examples/important screenshots, etc. Wherever necessary.
   - Presentation should be delivered in English only.
   - Stick to timings (Presentation should not exceed 10 minutes).

Viva/Question-Answer Session (Related to your Training)

OTHER EXPECTATIONS:

- Students are required to come only in Formal attire.
- Students should bring their laptops with them avoiding any unnecessary excuses during the presentation.

<u>CONTENTS OF THE REPORT</u>

(For those students who have just learnt a technology)

- Cover page (See Annexure-II)
- Declaration (See Annexure-III)
- Acknowledgement
- Summer training Certificate (From Training Institute)
- Table of Contents

1. Introduction

2. Technology Learnt (5-10 Pages)

   Describe about the technology learnt (hardware/software/networking; Databases/Web technology/ Application Programming etc.) In training organization and its actual applications/use/implementation/scope in real world software development.

3. Reason for choosing this technology.

4. Learning Outcome from training/technology learnt (5-10pages)

   (How this technology will help you in future? Support this description with illustrative technical examples)

5. Gantt chart (In case of training only)

6. Bibliography

<u>FORMATTING GUIDELINES</u>

- The matter contained in the report should be typed in MS word (1.5 spacing) Times New Roman, 12 pt.

- Figures and tables must be inserted in the text as they appear or may be appended in order

# <u>CONTENTS OF THE REPORT</u>

(For those students who have developed a Mini Project)

(Avoid unnecessary textual descriptions as you will be judged on the basis of quality and not on the basis of needless filling of pages).

- Cover page (See Annexure-II)
- Declaration (See Annexure-III)
- Acknowledgement
- Summer training Certificate (From Training Institute)
- Table of contents

1. Introduction

2. Profile of the Problem

3. Existing System

4. Problem Analysis
   - Product definition
   - Feasibility Analysis

5. Software Requirement Analysis

6. Design

   - Tables and their relationships
   - Flowcharts/Pseudo code

7. Testing

8. Implementation

9. Gantt chart (Describing a timeline of how did you act in six weeks of training?)

10. Project Legacy
    - Technical and Managerial lessons learnt.

12. Bibliography

FORMATTING GUIDELINES

- The matter contained in the report should be typed in MS word (1.5 spacing) Times New Roman, 12 pt.
- Figures and tables must be inserted in the text as they appear or may be appended in order.
